

Feedback

I found this project engaging	1	2	3	<input checked="" type="checkbox"/>	4	5
Researching a bird helped me further understand the forces of flight and flight adaptation	1	2	<input checked="" type="checkbox"/>	3	4	5
I enjoyed making a digital poster	1	2	3	4	<input checked="" type="checkbox"/>	5
Criteria was explained clearly	1	<input checked="" type="checkbox"/>	2	3	4	5

If you could change one aspect about this project what would you change?

probley having a bird assigned to use
so we would not have to spend a bunch
of time finding one that would be interesting

Any additional comments?

um when we were in charge of taking
not I was confused on what you meant
by flight & adaptations and I think some
clarification would have been great

Feedback for Ms. Gauthier

- 1) Highlight your favourite gym class: Cops and Robbers Gem Edition, Basketball Dribbling, Basketball Passing, Basketball Shooting, Basketball Blocking, SPUD, Gum Boot Dance

Explain why:

I liked cops and robbers because it involved football and running and tagging it was really fun tricking the cops into thinking you were a cop

- 2) Highlight your least favourite gym class: Cops and Robbers Gem Edition, Basketball Dribbling, Basketball Passing, Basketball Shooting, Basketball Blocking, SPUD, Gum Boot Dance

Explain why:

Basketball dribbling was my least favourite because I could not do it very well and it was hard to do it with a kick ball. (we ran out of basketballs)

- 3) Highlight your favourite Math or Science class: Forces of Flight, Bird Research and Digital Posters, Clothesline Math 1, Clothesline Math 2, Airplane Blueprints

Explain why:

I liked clothesline math 2 because it was fun trying to place the paper on the line and going up and showing where you placed it

- 4) Highlight your least favourite Math or Science class: Forces of Flight, Bird Research and Digital Posters, Clothesline Math 1, Clothesline Math 2, Airplane Blueprints

Explain why:

bird research was cool except it was hard to get it done in the time we had because my group was doing pelicans and there

- 5) What is one thing I did in my teaching that helped you learn?

doing clothesline math and talking to our groups about what we thought it was and then going up and showing it to the class

- 6) What is one thing I did not do in my teaching that could have helped you learn?

having a longer amount of time to do it and getting a longer lesson about it

Feedback for Ms. Gauthier

- 1) Highlight your favourite gym class: Cops and Robbers Gem Edition, Basketball Dribbling, Basketball Passing, Basketball Shooting, Basketball Blocking, **SPUD**, Gum Boot Dance

Explain why:

I liked SPUD because it got my blood pumping and it was fun for everyone to participate in every role.

- 2) Highlight your least favourite gym class: Cops and Robbers Gem Edition, Basketball Dribbling, Basketball Passing, Basketball Shooting, Basketball Blocking, **SPUD**, **Gum Boot Dance**

Explain why:

The only reason I picked Gum Boot Dance was only because it's not my favourite thing, and I was a little confused, so the only thing I would say is to maybe explain it a little more.

- 3) Highlight your favourite Math or Science class: Forces of Flight, **Bird Research and Digital Posters**, Clothesline Math 1, Clothesline Math 2, Airplane Blueprints

Explain why:

I loved this activity because it was a creative way to show our thinking, and we got a good amount of research time.

- 4) Highlight your least favourite Math or Science class: Forces of Flight, Bird Research and Digital Posters, **Clothesline Math 1**, Clothesline Math 2, Airplane Blueprints

Explain why:

I think you taught this really well, but I'm not a huge fan of decimals on number lines, so that's why I picked it.

- 5) What is one thing I did in my teaching that helped you learn?

You had really fun and creative ways to do projects, such as the bird digital poster.

- 6) What is one thing I did not do in my teaching that could have helped you learn?

Maybe next time, you can explain some of the activities a little more. Good luck!
